Decision:	Unknown
Date:	18th February 2005
Description:	Replacement of existing extension with brick built one

KM Maxfield

KM Maxfield is a modern independent estate agency with traditional values. Our office is situated in the 'World Heritage Site' of Saltaire, a beautiful area that we know like the back of our hands. We take pride in providing a personal and professional service. Our expertise expands across residential sales, lettings & property management and auctions, to working alongside financial advisors and conveyancers.

Our philosophy is simple. We keep the lines of communication open. Our experience tells us that being friendly, approachable and offering sound advice, is the only reliable way of building trust. We have an array of awards and titles under our belts including our Director, Karen Maxfield having been the first ever Lady President of the Bradford & District Auctioneers & Estate Agents Association.

Karen Maxfield MNAEA – Director

Karen has been a local estate agent for many years where she established a reputation for professional integrity and excellence. In 2005 she won the coveted NAEA Young Estate Agent of the Year Award in association with TTC training and was the 2010 first ever Lady President of the Bradford & District Auctioneers & Estate Agents Association.

Qualified in Level 2 & 3 Sale of Residential Property and is a member of the National Association of Estate Agents. The NAEA was established with the goal of upholding good practice and high professional standards in UK estate agency.

Karen was one of the founding Directors of Maxwells Residential Ltd before deciding to move on and put her own name above the door. She says "We are a modern, forward thinking estate agency which is based on traditional estate agency values. We can make a difference to our clients by providing a professional service that they can trust."

Testimonial 1

Thank you Karen and everybody at Maxfields for making the sale of our flat so easy. Your service help and kindness was very much appreciated. Would recommend Maxfields with no hesitation whatsoever.!

Testimonial 2

"I am writing to thank you for all your help in selling my mums house. We chose Maxfields because we thought your valuation was honest and accurate and you proved us right. You kept us informed every step of the way and have provided a thoroughly professional and caring service."

Testimonial 3

"I would recommend 'Maxfield' estate agents to anyone. I have never met a company so friendly and helpful. We put our house on the market and under a week it had sold. The kindness, help and advice was fantastic from such a warm family business. Many thanks."

Flood Risk

Surface Water - Flood Risk

This map shows the chance of flooding where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

-  **High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
-  **Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
-  **Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.25%) in any one year.
-  **Very Low Risk** - an area in which the risk is below 1 in 1000 (0.25%) in any one year.

Chance of flooding to the following depths at this property:

This map shows the future chance of flooding **between 2040 and 2060** where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Chance of flooding to the following depths at this property:

Flood Risk

Rivers & Seas - Flood Risk

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.25%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.25%) in any one year.

Chance of flooding to the following depths at this property:

Flood Risk

Rivers & Seas - Climate Change

This map shows the future chance of flooding from rivers and / or the sea **between 2036 and 2069**, taking into account flood defences and their condition. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.1%) in any one year.

This map displays nearby coal mine entrances and their classifications.

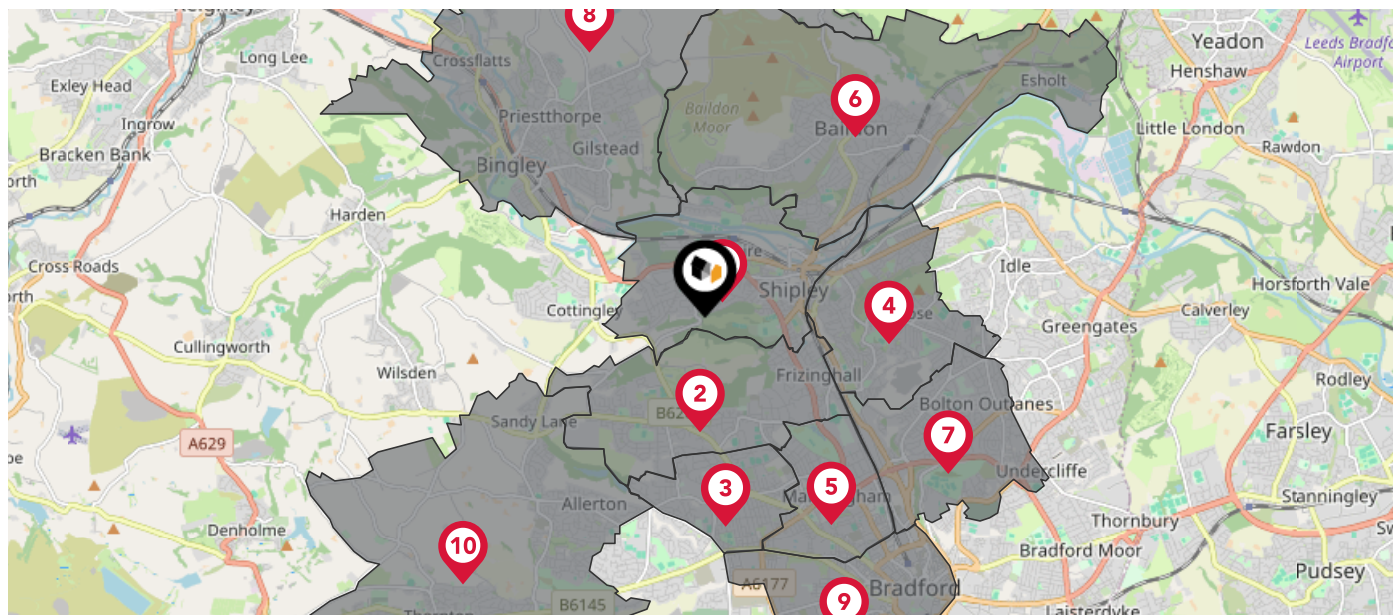

Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

Ground Composition for this Address (Surrounding square kilometer zone around property)

Carbon Content:	VARIABLE(LOW)	Soil Texture:	CLAYEY LOAM TO SILTY

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB
- 55.0-59.9 dB
