GENERAL

Pantmoch is a historic and renowned dairy farm lying on the edge of the nearby Teifi Valley.

The farm comprises of a range of modern purpose built agricultural animal housing and storage buildings as well as a recently constructed dairy unit.

The farmhouse is a traditional period property offering family proportioned accommodation.

The old traditional farm buildings remain in situ being Grade II listed and a former mill with potential for overflow accommodation/holiday lets/commercial use enjoying wonderful outlook over the valley below.

The remaining outbuildings are predominantly modern steel frame buildings with a dairy unit and cubicle housing covering just over 1.5 acres ground space.

Only a personal inspection of the farm will allow prospective purchasers to fully appreciate what is

offered for sale.

The farmhouse stands in a slightly elevated position away from the main yard and buildings overlooking the entire holding below and is finished in attractive dress stone construction under a slated roof with uPVC double glazing and oil fired central heating.

In total, the land at Pantmoch extends to some 158 acres with excellent road frontage and being well contained. A slurry lagoon with some 3 million gallon capacity built within the last 10 years is positioned in an elevated and central location on the farm convenient for servicing the adjoining fields .

In addition to the 158 acres, there is an option to purchase an additional 54 acres of equally productive grassland which includes 10 acres of native woodland. This parcel of land will not be available until the disposal of Pantmoch or forming part of the overall disposal.

Within the last 6 months the farm has generated 2 million litres of milk.
