Energy performance certificate (EPC)

iles on letting this property

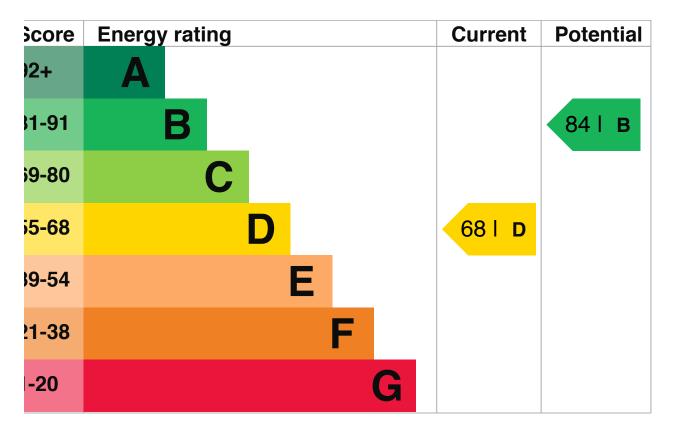

operties can be rented if they have an energy rating from A to E.

he property is rated F or G, it cannot be let, unless an exemption has been registered. You can read <u>guidance for landlords or regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-dlord-guidance).</u>

nergy efficiency rating for this property

is property's current energy rating is D. It has the potential to be B.

e how to improve this property's energy performance.

e graph shows this property's current and potential energy efficiency.

operties are given a rating from A (most efficient) to G (least efficient).

operties are also given a score. The higher this number, the lower your carbon dioxide (CO2) emissions are likely to be.

e average energy rating and score for a property in England and Wales are D (60).

eakdown of property's energy performance

is section shows the energy performance for features of this property. The assessment does not consider the condition of a sture and how well it is working.

.ch feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

nen the description says 'assumed', it means that the feature could not be inspected and an assumption has been made base the property's age and type.

ature	Description	Rating
Ile	Cavity wall, as built, insulated (assumed)	Good
of	Pitched, 100 mm loft insulation	Average
ndow	Fully double glazed	Average
in heating	Boiler and radiators, mains gas	Good
in heating control	Programmer and room thermostat	Average
t water	From main system	Good
ıhting	Low energy lighting in 25% of fixed outlets	Average
or	Suspended, limited insulation (assumed)	N/A
or	To unheated space, limited insulation (assumed)	N/A
condary heating	None	N/A

rimary energy use

e primary energy use for this property per year is 201 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

ivironmental impact of this property

ne of the biggest contributors to climate change is carbon dioxide (CO2). The energy used for heating, lighting and power in of mes produces over a quarter of the UK's CO2 emissions.

n average household roduces	6 tonnes of CO2
nis property produces	4.6 tonnes of CO2
his property's potential roduction	2.2 tonnes of CO2

making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 2.4 tonnes per year. This will help to steet the environment.

vironmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how ergy is consumed by the people living at the property.

ow to improve this property's energy performance

aking any of the recommended changes will improve this property's energy efficiency.

vou make all of the recommended changes, this will improve the property's energy rating and ore from D (68) to B (84).

What is an energy rating?

Potential energy rating

ecommendation 1: Increase loft insulation to 270 m

rease loft insulation to 270 mm

pical installation cost	£100 - £350
/pical yearly saving	£46
otential rating after carrying out ecommendation 1	69 I C

ecommendation 2: Floor insulation (suspended floor)

or insulation (suspended floor)

pical installation cost	£800 - £1,200
pical yearly saving	£47
otential rating after carrying out commendations 1 and 2	70 I C

ecommendation 3: Low energy lighting

w energy lighting

pical installation cost	£60
/pical yearly saving	£49

otential rating after carrying out commendations 1 to 3

lecommendation 4: Heating controls (thermostatic radiator alves)

ating controls (TRVs)

pical installation cost	£350 - £450
/pical yearly saving	£34
otential rating after carrying out commendations 1 to 4	73 I C

ecommendation 5: Replace boiler with new condensing boiler

indensing boiler

pical installation cost	£2,200 - £3,000
pical yearly saving	£95
otential rating after carrying out commendations 1 to 5	76 I C

ecommendation 6: Solar water heating

lar water heating

pical installation cost	£4,000 - £6,000
/pical yearly saving	£45
otential rating after carrying out commendations 1 to 6	77 I C

ecommendation 7: Solar photovoltaic panels, 2.5 kWp

lar photovoltaic panels

pical installation cost	£5,000 - £8,000
/pical yearly saving	£283
otential rating after carrying out commendations 1 to 7	84 I B

aying for energy improvements

and energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

stimated energy use and potential savings

stimated yearly energy cost for this roperty	£1052
otential saving	£317

e estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is to based on how energy is used by the people living at the property.

e estimated saving is based on making all of the recommendations in how to improve this property's energy performance.

r advice on how to reduce your energy bills visit Simple Energy Advice (https://www.simpleenergyadvice.org.uk/).

leating use in this property

ating a property usually makes up the majority of energy costs.

stimated energy used to heat this property

pace heating	11888.0 kWh per year
ater heating	2832.0 kWh per year

ntantial anaray eavings by installing insulation

otential energy savings by mistaining misulation

pe of insulation Amount of energy saved

ft insulation 869 kWh per year

u might be able to receive Renewable Heat Incentive payments (https://www.gov.uk/domestic-renewable-heat-incentive). This will perform to reduce carbon emissions by replacing your existing heating system with one that generates renewable heat. The timated energy required for space and water heating will form the basis of the payments.

ontacting the assessor and accreditation scheme

is EPC was created by a qualified energy assessor.

vou are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

ou are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

creditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
