### survey report on:

Property address	26 SCHOOL TERRACE, ABERDEEN, AB24 1TW
Customer	L. GUNN
Customer address	26 SCHOOL TERRACE, ABERDEEN, AB24 1TW
Prepared by	Graham + Sibbald
Date of inspection	7th May 2025

### **GRAHAM + SIBBALD**

#### **PART 1 - GENERAL**

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property<sup>1</sup>.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

Х

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Codes of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether
  or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.<sup>2</sup>

#### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

<sup>&</sup>lt;sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

#### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.1 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

#### PART 2 - DESCRIPTION OF THE REPORT

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

#### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

#### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

#### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

#### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

#### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein

the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

#### 1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Purpose-built first floor flat within a two storey, detached block containing 4 separate flatted units, originally constructed on behalf of the Local Authority.
Accommodation	FIRST FLOOR - Hall; Living Room with Kitchen off; Bedroom; Shower Room.
Gross internal floor area (m²)	48 or thereby.
Neighbourhood and location	The property is situated around 2 miles north of Aberdeen city centre in the Seaton district and forms part of a Local Authority residential area, where surrounding properties are of similar age and style. A good range of facilities and amenities can be found within reasonable distance.
Age	Built circa 1930.
Weather	Sunny and dry.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	Chimney stacks are of pointed brick construction with lead flashing at the roof line and clay pots bedded in cement haunchings.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.
	If this is not possible, then physical access to the roof space

Roofing including roof space	may be taken by other means if the Surveyor deems it safe
3 1 1 1	and reasonable to do so.
	Roof - Pitched and hipped and clad in slates with pointed clay tiled ridge and cement hips.
	Roof space - Access hatch at the top of the common hallway, adjacent to the flat entrance door. The roof is framed in timber joists and rafters overlaid with timber board sarking. Glass wool quilt insulation is laid between and over ceiling joists.
	Inspection of the roof void was restricted to a view from the hatch due to the presence of glass wool quilt insulation being laid between and over ceiling joists and the absence of suitable crawl boards.
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	Cast iron gutters and downpipes connected to the drainage system.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	The main external walls are of traditional brick cavity construction, roughcast externally and incorporating pointed facing brick feature areas.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	Windows - UPVC double glazed casement type.
	Entrance door to the flat - Panelled timber.
External decorations	Visually inspected.
	Paint finishes to external timbers, metalwork and brickwork.
Conservatories / porches	None.
Communal areas	Circulation areas visually inspected.
	The property is accessed via a communal entrance hall with concrete floor and stair providing access to the upper floor. There is a panelled timber entrance door with glazed insert. Walls are plastered on the hard and painted.

Garages and permanent outbuildings	None.
Outside areas and boundaries	Visually inspected.
	There is a shared surfaced path to the front and side and shared grass drying area to the rear. There is also an exclusive area of garden ground to the rear which is laid in grass.
	Boundaries are formed in timber and metal fencing.
Ceilings	Visually inspected from floor level.
	Lath and plaster on timber framing.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Part lath and plaster on timber framing and part brick, plastered on the hard and part plasterboard on timber framing.
Floors including sub floors	Floors - Mostly suspended timber construction with timber joists overlaid with timber tongue and groove boards, with the exception of the kitchen which is formed in suspended concrete. There is no sub-floor area to inspect.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Internal joinery - panel effect and flush timber doors set in timber frames with associated timber architraves and skirtings. Cupboards in the living room, kitchen and bedroom.
	Kitchen fittings - Base and wall mounted fitted units with laminate worktop.
Okimpan kanasta an 18m l	
Chimney breasts and fireplaces	Visually inspected.
	No testing of the flues or fittings was carried out.
	The chimney breasts are formed in brick. Fireplaces have been removed and blanked over in the past.
Internal decorations	Visually inspected.
	Internal decoration is of paint finish throughout. There are areas of wet wall panelling in the shower room.

Cellars	None.
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.  Mains supply with main consumer unit located in the bedroom cupboard and meter located in a housing on the wall of the shared entrance. Wiring appears to be pvc coated cabling to 13 amp sockets and switches.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.
	Mains gas supply with meter located at floor level in the kitchen cupboard.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Water supply - Mains supply. Plumbing and fittings are of pvc and copper piping.
	Kitchen fittings - Stainless steel sink and plumbing for washing machine.
	Shower room fittings - White two-piece suite, plus shower compartment with mixer shower fitting.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	Central heating - Gas fired, wall-mounted Ideal Logic condensing combi boiler located in the bedroom cupboard, which serves steel panel hot water radiators and towel rail.
	Hot water - The central heating boiler provides hot water on demand.

# Drainage Covers etc were not lifted. Neither drains nor drainage systems were tested. Drainage discharges into the main sewer.

#### Fire, smoke and burglar alarms

#### Visually inspected.

No tests whatsoever were carried out to the system or appliances.

Smoke alarms and carbon monoxide detector fitted.

New smoke alarm standards were introduced in Scotland in February 2022 and it is likely that some properties may require additional works to meet these standards. In instances where alarms are in place, no tests whatsoever have been carried out and we cannot confirm if the system complies with the most recent regulations. Any potential purchaser should satisfy themselves as to whether the current system meets with regulations or otherwise.

#### Any additional limits to inspection

#### For flats / maisonettes

Only the subject flat and internal communal areas giving access to the flat were inspected.

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

It is outwith the scope of this inspection to determine whether or not asbestos based products are present within the property. Asbestos was widely used in the building industry until around 1999, when it became a banned substance. If you have any concerns you should engage the services of a qualified asbestos surveyor.

No inspection for Japanese Knotweed was carried out and unless otherwise stated for the purpose of this report, it is assumed that there is no Japanese Knotweed within the boundaries of the property or neighbouring properties.

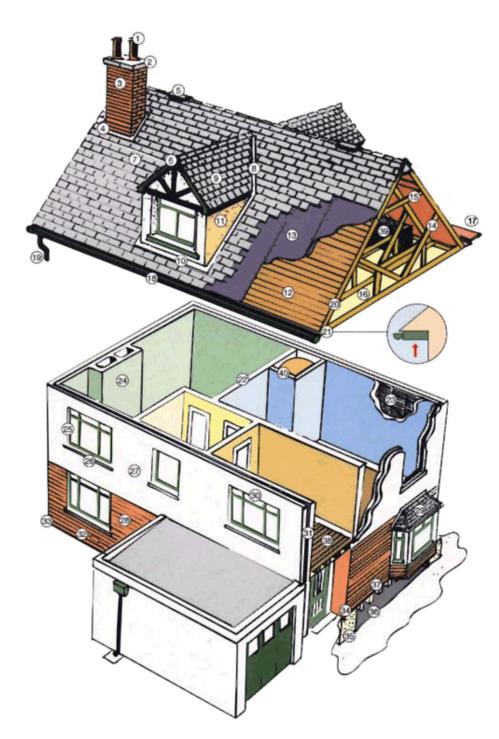

Insulation has been laid over the roof joists and accordingly a head and shoulders inspection of the roof space was possible only.

It should be appreciated that the Home Report inspection is a nondisruptive visual inspection of the property as at the date of inspection and that we are unable to inspect parts of the property which are concealed or covered by floor coverings or contents in place at that time. Once vacant, defects may be apparent that could not be detected during our survey. Changing weather conditions can also affect aspects of the property which would not be apparent at the time of inspection.

The property was fully furnished at the time of our inspection and the services were not tested.

Any additional limits to inspection	No access was obtained to sub-floor areas.
	A restricted inspection was possible only of the roof and chimneys from ground level.
	Due to fitted carpets and floor coverings no detailed inspection was possible of the floor timbers and accordingly we cannot guarantee their soundness or otherwise.
	Restricted inspection in cupboards due to storage items.
	Windows were not all fully opened or tested.

### Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 1) Chimney pots
- 2) Coping stone
- 3) Chimney head
- 4 Flashing
- 5) Ridge ventilation
- 6) Ridge board
- 7) Slates / tiles
- 8 Valley guttering
- 9 Dormer projection
- 10 Dormer flashing
- 11) Dormer cheeks

- 37) Floor joists
- 38) Floorboards
- 39) Water tank
- 40) Hot water tank

#### 2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category	1
Notes	At the time of our inspection there was no evidence of significant structural movement noted to affect the property within the limits of our inspection.

Dampness, rot and infestation	
Repair category	1
Notes	There is a light scattering of woodworm flight-holes to some roof timbers. These would appear old and inactive.

Chimney stacks	
Repair category	1
Notes	These appeared generally in fair condition consistent with age. It should be appreciated that flashing details require ongoing maintenance to ensure water tightness.

Roofing including roof space	
Repair category	2
Notes	There are a number of chipped and squint slates. The roof covering is now of an age where ongoing repair and regular maintenance will be required and it would be prudent to seek the advice of a roofing contractor to comment on its current condition and expected lifespan. There is a light scattering of woodworm flightholes to some roof timbers, which would appear old and inactive. There are also areas of old staining to timbers, particularly around the chimney.

Rainwater fittings	
Repair category	2
Notes	There are corroded sections of gutter as well as vegetation growth. There is a missing section of gutter to the front corner. Repairs and ongoing maintenance will be required.
	It should be noted that it was not raining at the time of our inspection and gutters should be checked during heavy rainfall to ensure they are free from leakage.

Main walls	
Repair category	2
Notes	There are areas of cracked and bossed harling as well as some patched sections.  Some open pointing was noted to the brickwork basecourse.

Windows, external doors and joinery	
Repair category	1
Notes	Windows can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance/ repair will be required as part of an ongoing maintenance programme.

External decorations	
Repair category	2
Notes	Upgrading works are required to weathered decoration.

Conservatories/porches	
Repair category	-
Notes	Not applicable.

Communal areas	
Repair category	1
Notes	Fair condition with normal wear/weathering evident. Some plaster cracking was noted.

Garages and permanent outbuildings	
Repair category	-
Notes	Not applicable.

Outside areas and boundaries	
Repair category	1
Notes	Fair condition with normal weathering evident.

Ceilings	
Repair category	1
Notes	No significant defects noted within the limitations of our inspection.

Internal walls	
Repair category	1
Notes	No significant defects noted within the limitations of our inspection. Some areas of uneven plasterwork were noted in kitchen and bedroom cupboards.

Floors including sub-floors	
Repair category	1
Notes	No significant defects were evident to the flooring at surface level, within the limitations imposed by fully fitted floor coverings.  There are a number of uneven and loose floorboards. If these are to be refixed
	care should be taken not to puncture any adjacent sub-floor services.

Internal joinery and kitchen fittings	
Repair category	1
Notes	No significant defects noted within the limitations of our inspection.

Chimney breasts and fireplaces	
Repair category	1
Notes	It should be ensured that blocked fireplaces are adequately ventilated to prevent a build-up of moisture within the flue.

Internal decorations	
Repair category	1
Notes The property has recently been redecorated throughout with the exception of inside cupboards.	

Cellars	
Repair category	-
Notes	Not applicable.

Electricity	
Repair category	1
Notes	A new consumer unit has recently been installed as well as new switchplates. All available documentation relating to these works should be transferred.  The Institution of Engineering and Technology recommends that inspections and testing are undertaken at least every five years and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations.

Gas	
Repair category	1
Notes	In the interest of safety all gas appliances should be checked by a Gas Safe Registered Engineer.

► Water, plumbing and bathroom fittings	
Repair category	1
Notes	It should be appreciated that concealed areas beneath and around baths and shower trays could not be inspected. Water spillage in these areas can result in dampness/decay and no comment can be made on inaccessible areas. Waterproof seals in sanitary areas should be checked and maintained on a regular basis. Some discolouration was noted to the shower tray seal.

Heating and hot water	
Repair category	1
Notes	There is a gas fired central heating system and gas fittings and these should all be checked and serviced in the normal manner. In the interests of safety it would be prudent to have all gas appliances checked by a Gas Safe registered tradesman.
	It is assumed that the central heating system has been properly installed, updated and maintained to meet with all current regulations and standards with particular regard to fluing and ventilation requirements.

Drainage	
Repair category	1
Notes	The property is connected to a main sewer. There was no surface evidence to suggest the system is choked or leaking.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	1

#### Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

#### Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

#### Category 1

No immediate action or repair is needed.

#### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

#### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

#### 3. Accessibility information

#### Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	First floor
2. Are there three steps or fewer to a main entrance door of the property?	Yes No X
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes X No
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

#### 4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

#### Matters for a solicitor or licensed conveyancer

We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate.

Absolute ownership assumed. We are unaware of any easements, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the Title Deeds.

The subjects form part of a block of flats and it has been assumed that maintenance/ repair costs of the common parts of the building and external grounds will be shared on an equitable basis with the adjoining proprietors. It is therefore assumed that the costs of repairs detailed within this report which relate to these areas should be apportioned accordingly, although exact liability should be confirmed.

It is recommended that when repairs, defects or maintenance items have been identified interested parties make appropriate enquiries in order to satisfy themselves of potential costs and the extent of the works required prior to submitting a legal offer to purchase.

This is a Replacement Home Report, our original inspection was carried out on 02/05/2024.

#### Estimated reinstatement cost for insurance purposes

It is assumed that insurance cover is obtainable on normal terms. The guidance figure is the estimate of costs for reinstating the subjects as at the date of inspection based on information provided by the Building Cost Information Service (BCIS). It is recommended that this figure is kept under regular review to ensure that you have adequate insurance cover. We are of the opinion that the subjects should be insured for buildings reinstatement purposes for a sum of not less than £170,000 (One Hundred and Seventy Thousand Pounds Sterling).

#### Valuation and market comments

We are of the opinion that the market value of the subjects all as previously described and on a vacant possession basis would be fairly stated in the region of £75,000 (Seventy-Five Thousand Pounds Sterling).

Our valuation reflects current market conditions relating to this area. We would assume that current trends will prevail at the ultimate date of disposal with no adverse or onerous matters being introduced into the market during the intervening period which would have a detrimental effect on price.

General Remarks						
The property is situated around 2 miles north of Aberdeen city centre in the Seaton district and forms part of a Local Authority residential area, where surrounding properties are of similar age and style. A good range of facilities and amenities can be found within reasonable distance.						
The property has recently been refurbished throughout internally.						
Some works of repair and maintenance are required externally and elements of the property are ageing and likely to require attention.						
The subjects form part of a block of flats and it has been assumed that maintenance/ repair costs of the common parts of the building and external grounds will be shared on an equitable basis with the adjoining proprietors.						
Essential Repairs						
Estimated cost of essential repairs £ Retention recommended? Yes No Amount £
