NURTURING SUSTAINABLE FOUNDATIONS

The Paddocks Street Scene

Discover how we secure sustainability at The Paddocks. Sustainability is best defined as meeting the demands of today without compromising the needs of future generations.

DESIGNED FOR THE FUTURE

- Car charging and external power points
- Energy efficient LED lighting and appliances within the home
- Water butt to every home to conserve rain water which promotes eco-friendly garden watering
- Heating system using SMART technology
- Air Source Heat Pumps (ASHP) to all homes
- Underfloor heating to ground floor and low temperature radiators to upper floor to some homes
- Mechanical Ventilation Heat Recovery system to some homes

GREENER LIVING

We take great care in the design, location and construction of the new homes we build and strive to reduce the impact upon, or significantly improve, the quality of the environment in and around our developments.

CAREFULLY CRAFTED

- Houses will be of traditional style and architectural character
- Our landscape vision is intended to unify the character of the development providing a natural extension to Bow Brickhill with the enhancement of inherited natural assets.
- The development incorporates architectural detailing from the surrounding villages and local vernacular to ensure the scheme is integrated with its context

ECOLOGICAL EFFORTS

A wealth of wildlife call The Paddocks home and the development has been designed to encourage more to move in. The landscape in and around the development has been retained where possible and enhanced with mature planting while preservation measures have been implemented to safeguard existing wildlife populations. These improvements are designed to integrate into the existing habitats at The Paddocks, boost them and create a framework that ensures that local flora and fauna can thrive.

TREES, HEDGEROWS AND SHRUBS

Areas with mature trees and vegetation of ecological value have been identified and incorporated into the design of the development. Significant native tree planting and 100% uplift in hedgerows help to attract and provide habitat for a range of creatures. Tree lined streets help create corridors for wildlife and ensure increased natural foraging and commuting areas for birds. These also help connect the development with its surroundings as a natural extension to Bow Brickhill.

BIRDS AND BATS

A variety of bird boxes have been installed across The Paddocks on our homes, including ‘sparrow terraces’, bat boxes and swift bricks.

HEDGEHOGS

For hedgehogs, specialist fencing has been installed with holes large enough for hedgehogs to pass through, allowing them to roam freely. Hedgehog domes provide a safe home for breeding and hibernation.

REPTILES

To provide safe havens for reptiles, habitat piles and hibernacula will be formed around the development. Hibernacula are designed to give shelter and security for native reptiles but also provide a valuable environment for saproxylic invertebrates (deadwood dependent insects) and in turn, a food source for reptiles, amphibians, as well as birds and mammals.

Bow Brickhill

A LOCAL WAY OF LIFE

Bow Brickhill has a strong community feel and
The Paddocks is nestled in the heart of this
charming village.

The village Bow Brickhill was originally known as Brichelle. This name dates from the 11th century, whereas the current name is derived from Brythonic and Old English words for hill – breg and hyll. The prefix Bow comes from an Anglo Saxon personal name, Bolla.

The Church of England parish church of All Saints is believed to date from the 12th century and sits on the side of a steep hill. It underwent a series of redevelopments in the 15th century and was restored by Browne Willis in 1757. The hymn tune, Bow Brickhill, was composed in honour of the church after Sydney Nicholson and his choristers from Westminster Abbey performed there in 1923.

Local amenities include a brewery and The Wheatsheaf Pub and Grill, only a short walk from The Paddocks. There is also a nursery, primary school, community hall and recreational area with a pavilion.

Milton Keynes

A PLACE TO EXPLORE

A short drive away is Milton Keynes, a purpose built city created in the 1960's as part of a generation of new towns to help relocate and ease housing congestion in London. It was built with the future in mind, creating a grid system of roads and roundabouts between districts.
