# **Energy performance certificate (EPC)**

115a, Huddersfield Road
Shelley
HUDDERSFIELD
HD8 8HF

Energy rating
Certificate number:

Valid until: 8 December 2029

Certificate 0118-3985-7292-6881-1974

Property type Semi-detached house

**Total floor area** 117 square metres

### Rules on letting this property

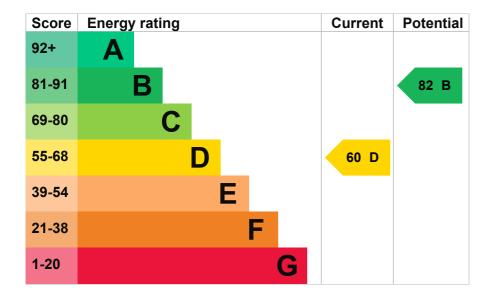

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

### **Energy rating and score**

This property's current energy rating is D. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

### Breakdown of property's energy performance

# Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Poor
Roof	Pitched, 200 mm loft insulation	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs Good	
Hot water	From main system Good	
Lighting	Low energy lighting in 50% of fixed outlets	
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, electric	N/A

# Primary energy use

The primary energy use for this property per year is 285 kilowatt hours per square metre (kWh/m2).

About primary energy use

### **Additional information**

Additional information about this property:

· Stone walls present, not insulated

### How this affects your energy bills

An average household would need to spend £1,360 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £486 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2019** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

# **Heating this property**

Estimated energy needed in this property is:

- 17,885 kWh per year for heating
- 2,287 kWh per year for hot water

### Impact on the environment

This property's current environmental impact rating is D. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment.

### Carbon emissions

An average household produces	6 tonnes of CO2
This property produces	5.8 tonnes of CO2
This property's potential production	2.7 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

▶ <u>Do I need to follow these steps in order?</u>

Step 1	: Internal	or external	wall insulation
--------	------------	-------------	-----------------

Typical installation cost	£4,000 - £14,000
Typical yearly saving	£331
Potential rating after completing step 1	70 C

# **Step 2: Floor insulation (suspended floor)**

Potential rating after completing steps 1 and 2	72 C
Typical yearly saving	£91
Typical installation cost	£800 - £1,200

# Step 3: Low energy lighting

Potential rating after completing steps 1 to 3	73 C
Typical yearly saving	£33
Typical installation cost	£20

# Step 4: Solar water heating

Typical installation cost	£4,000 - £6,000
Typical yearly saving	£31
Potential rating after completing steps 1 to 4	74 C

# Step 5: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£3,500 - £5,500
Typical yearly saving	£291
Potential rating after completing steps 1 to 5	82 B

# Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

#### Who to contact about this certificate

## **Contacting the assessor**

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Thomas Mortimer	
Telephone	02033978220	
Email	help@epconline.co.uk	

# Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Quidos Limited
Assessor's ID	QUID207239
Telephone	01225 667 570
Email	info@quidos.co.uk

### About this assessment

Assessor's declaration	No related party
Date of assessment	9 December 2019
Date of certificate	9 December 2019
Type of assessment	► RdSAP

### Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at <u>dluhc.digital-services@levellingup.gov.uk</u> or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).

There are no related certificates for this property.
