## Survey Report on:

<b>Property Address</b>	Little Bargour, Mauchline Road,  , Hurlford, KA1 5JX
<b>Reference</b>	1396858
<b>Customer Name</b>	Susan Hoggans
<b>Date of Inspection</b>	27th January 2026
<b>Surveyor's name, qualifications and office</b>	Kevin Masson BSc (Hons) MRICS  DM Hall LLP Chartered Surveyors Eldo House, Monkton Road, Prestwick, KA9 2PB  Tel: 01292 286974  email: ayrshireresidential@dmhall.co.uk
<b>Prepared By</b>	DM Hall LLP

## SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)

### PART 1 - GENERAL

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property.<sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box. ☒

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

---

<sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

## 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party, they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report, it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

## 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and

- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

## **1.4 GENERIC MORTGAGE VALUATION REPORT**

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

## **1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES**

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional adviser or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.<sup>2</sup>

## **1.6 INTELLECTUAL PROPERTY**

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

## **1.7 PAYMENT**

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

## **1.8 CANCELLATION**

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily.

---

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

## 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

## 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which an asset or liability should exchange on the valuation date, between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;

- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

## PART 2 - DESCRIPTION OF THE REPORT

### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

### 2.3 THE REPORT

The report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the

property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1** **Category 3:** Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2** **Category 2:** Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3** **Category 1:** No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, they may recommend further investigation by specialist contractors.

## 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

## 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

## 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

## 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the reinstatement cost, as defined below.

*“Market value” The estimated amount for which an asset or liability should exchange on the valuation date, between a willing buyer and a willing seller in an arm’s length transaction,*

*after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.* In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

*"Reinstatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated.* This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

## 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

<b>Description</b>	The subjects comprise of a detached single storey and attic chalet style cottage.
<b>Accommodation</b>	Ground Floor: porch, hall, kitchen, inner hall, two bedrooms, bathroom, lounge, dining room and sitting room.  First Floor: landing and two bedrooms.
<b>Gross Internal Floor Area (m2)</b>	Approximately 157m <sup>2</sup> .
<b>Neighbourhood and Location</b>	The subjects are located rurally between the towns of Kilmarnock and Mauchline, just off of the A76. Local amenities can be found within a reasonable commute.  It should be appreciated that the A76 and a railway line run close to the subjects.  The cessnock water runs within the property boundary.
<b>Age</b>	Built circa 1800 (226 years old)
<b>Weather</b>	Heavy rain showers. Weather over recent weeks has been unsettled.
<b>Chimney Stacks</b>	<b>Visually inspected with the aid of binoculars where appropriate.</b>  Stone or brick construction with rendered finish and metal flashings.

<b>Roofing including Roof Space</b>	<p>Sloping roofs were visually inspected with the aid of binoculars where appropriate.</p> <p>Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.</p> <p>If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.</p> <p>The roof is of pitched design and overlaid with slates with a metal ridge.</p> <p>There are sections of flat roof which are overlaid with felt or a similar material.</p> <p>The roof structure is of timber truss construction with timber sarking boards. Insulation materials have been laid in between ceiling joists.</p>
<b>Rainwater Fittings</b>	<p>Visually inspected with the aid of binoculars where appropriate.</p> <p>Gutters and downpipes are formed in PVC materials and cast iron.</p>
<b>Main Walls</b>	<p>Visually inspected with the aid of binoculars where appropriate.</p> <p>Foundations and concealed parts were not exposed or inspected.</p> <p>Outer walls appear of stone construction with a rendered or painted finish. Outer walls of the rear projection are assumed to be of lightweight timber construction with a rendered finish.</p>
<b>Windows, External Doors and Joinery</b>	<p>Internal and external doors were opened and closed where keys were available.</p> <p>Random windows were opened and closed where possible.</p> <p>Doors and windows were not forced open.</p> <p>Access to the property is via UPVC glazed doors to the porch and glazed sliding doors within the dining room. There are lockable timber and glazed doors between the porch and kitchen/hall.</p>

	The subjects are fitted with UPVC double and single glazed units.
<b>External Decorations</b>	No significant external decoration.
<b>Conservatories and Porches</b>	<b>Visually inspected.</b>  There is a porch built to the front of the property. This appears of brick/timber construction under a felt or similar covering.
<b>Communal Areas</b>	None.
<b>Garages and Permanent Outbuildings</b>	<b>Visually inspected.</b>  There is a detached garage of concrete panel construction under a corrugated cement roof covering.  There is an attached outhouse.  There are timber stables.  There are various other timber stores and sheds.
<b>Outside Areas and Boundaries</b>	<b>Visually inspected.</b>  The seller has advised that the area of land included with the property extends to approximately 10 acres. The valuation is based on the assumption that this information is correct.  Visible garden grounds are laid to lawn, hard landscaped and of mature shrubbery. Visible boundaries are of timber fencing, hedging and post and wire fencing.
<b>Ceilings</b>	<b>Visually inspected from floor level.</b>  Assumed to be of lath and plaster materials.
<b>Internal Walls</b>	<b>Visually inspected from floor level.</b>  <b>Using a moisture meter, walls were randomly tested for dampness where considered appropriate.</b>  Plastered on the hard, dry lined with plasterboard sheets or of lath and plaster materials.
<b>Floors including Sub-floors</b>	<b>Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.</b>  Flooring is of solid concrete or suspended timber.

<b>Internal Joinery and Kitchen Fittings</b>	<p>Built-in cupboards were looked into, but no stored items were moved.</p> <p>Kitchen units were visually inspected excluding appliances.</p> <p>There are floor and wall units within the kitchen.</p> <p>Internal doors are of timber design.</p> <p>Internal joinery is formed in timber,</p>
<b>Chimney Breasts and Fireplaces</b>	<p>Visually inspected.</p> <p>No testing of the flues or fittings was carried out.</p> <p>There is an open coal fire in the lounge and a gas fire in the sitting room.</p>
<b>Internal Decorations</b>	<p>Visually inspected.</p> <p>Generally painted or papered with tiling and timber cladding in some apartments.</p>
<b>Cellars</b>	<p>None.</p>
<b>Electricity</b>	<p>Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</p> <p>Mains supply. Visible wiring is of PVC coated cabling and there are electrical sockets throughout. The consumer unit and meter are located within the kitchen.</p>
<b>Gas</b>	<p>Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</p> <p>Mains supply. The meter is assumed to be located within an external box.</p>
<b>Water, Plumbing and Bathroom Fittings</b>	<p>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any</p>

	<p><b>insulation.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>Water is connected to the mains supply. Visible pipework is made with copper and PVC materials.</p> <p>There are sink units in a ground floor and first floor bedrooms and kitchen.</p> <p>The bathroom comprises of a three piece suite.</p>
<b>Heating and Hot Water</b>	<p><b>Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>Space heating is provided by a gas fired system of radiators throughout. The system is fired by the "Worcester" boiler which is located within the kitchen.</p>
<b>Drainage</b>	<p><b>Drainage covers etc were not lifted.</b></p> <p><b>Neither drains nor drainage systems were tested.</b></p> <p>Drainage is assumed to be connected to the main sewer.</p>
<b>Fire, Smoke and Burglar Alarms</b>	<p><b>Visually inspected.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>Smoke detectors have been installed.</p>
<b>Any Additional Limits to Inspection</b>	<p>At the time of inspection the property was occupied, fully furnished and floors were covered. Furnishings, personal items (particularly in cupboards) and floor coverings have not been disturbed/moved.</p> <p>Inspection of cupboards was limited due to items within.</p> <p>Random windows and doors are opened but not all and inspections can be restricted by window blinds, curtains, ornaments etc. Handles, locks and opening mechanisms can deteriorate through usage and repair or replacement can be anticipated on an ad hoc basis. No assurances can be provided that all window fitments are functional.</p> <p>Stormy weather conditions have been experienced in</p>

recent times. Inspection from ground level may not identify minor defects which could then prove to be problematic when subjected to such conditions. It is therefore important that, where applicable, roof coverings, chimney stacks, valleys, flashings and rainwater goods (this is not an exhaustive list) are well maintained and are regularly checked. If severe weather is experienced it is essential that a visual check is made to such areas and specialist advice sought if defects are noted.

It should be appreciated that the Home Report is a non-disruptive visual inspection of the property as at the date of inspection and that we are unable to inspect parts of the property which are concealed or covered by items, furnishing, floor coverings etc in place at that time. Defects may become apparent that could not be detected during our survey. Changing weather conditions can also affect aspects of the property which would not be apparent at the time of inspection.

Inspection of the roof space accessed from the inner hall off of the kitchen was restricted to a head and shoulders inspection and was generally limited to the area immediately surrounding the access hatch only. The overall inspection was further restricted due to insulation materials. These have not been disturbed.

Inspection of the eaves hatches accessed from an upper bedroom was restricted to a head only inspection and was limited to the area immediately surrounding the access hatch only. The overall inspection was further restricted due to insulation materials. These have not been disturbed. There is an attic store/eaves space, within the same bedroom, however this was not accessible as the door was taped shut.

Inspection of the attic store accessed from a hatch off of the other upper bedroom was restricted to the floored area only and was further limited due to insulation and stored items. These have not been disturbed.

No sub floor inspection was possible.

It was not possible to inspect all garden grounds therefore our inspection was limited to the grounds immediately surrounding the subject property only.

Inspection of the garage, stables, outhouse and various other stores/sheds was limited due to items and livestock

within.

Parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.

I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purposes of the valuation I have assumed that there is no Japanese Knotweed or other invasive plants within the boundaries of the property or in neighbouring properties.

The report does not include an asbestos inspection. However asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported within the limitations of the inspection and you have concerns, you should engage a qualified asbestos surveyor.

Random testing for dampness was undertaken internally with the use of a moisture meter where accessible and considered appropriate.

Concealed areas beneath and around sanitary fittings were not visible. Due to the presence of water, there is an inherent risk of leakage and resultant damage to concealed areas which may only become apparent when the building fabric is opened up for examination.

The inspection is not a fire or life safety risk assessment and should not be relied on as a risk assessment inspection. Further advice should be sought if a specific risk assessment of the property and building that it forms part of is required.

Where repairs are required at height compliance with Health and Safety legislation often requires the use of scaffolding which can significantly impact on the cost of repair. Pricing repairs is outwith the remit of this report but it would be prudent to consider costs and budgeting before offering. The various trades can advise further.

## Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

## 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural Movement	
Repair Category	1
Notes	The property has been affected by previous movement but within the limitations of the inspection there was no evidence to suggest that this is ongoing.

Dampness, Rot and Infestation	
Repair Category	2
Notes	<p>Damp staining and elevated readings were noted to some walls and chimney breasts internally. Prolonged dampness can increase the risk of timber defects and it is important to remedy water ingress timeously to prevent further deterioration of the building. These areas should be monitored and further advice sought.</p> <p>There is evidence of condensation. This may be alleviated by a proper balance of heating and ventilation.</p> <p>There is evidence of a wood boring insect infestation within the roof space. This can be treated by a Timber Specialist contractor.</p>

# Single Survey

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Chimney Stacks	
Repair Category	2
Notes	<p>Chimney stacks are frequently troublesome and are often a source of dampness/water ingress. On-going monitoring/maintenance can be anticipated. It may be prudent to have the chimney stack inspected prior to purchase.</p> <p>General weathering, staining and cracking was noted.</p>

# Single Survey

Category 3	Category 2	Category 1
<b>Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.</b>	<b>Repairs or replacement requiring future attention, but estimates are still advised.</b>	<b>No immediate action or repair is needed.</b>

Roofing including Roof Space	
Repair Category	2
Notes	<p>There are a some weathered, broken and loose slates together with staining and water ingress to roof timbers. A reputable roofing contractor can be asked to inspect the roof structure to advise on all necessary repairs to ensure wind and water tightness. Inspection at close quarters may reveal further deterioration/damage to roofing materials, especially where these are original. Regular maintenance is anticipated until replacement.</p> <p>Natural slates have an expected lifespan of up to 100 years or more depending on slate quality, source, thickness and cutting skill of the slater. Slates deteriorate over time; nail fixings corrode and loosen resulting in on-going maintenance requirements. Close quarter inspection may reveal damage to roofing materials, especially where these are original. Regular maintenance should be anticipated particularly after adverse weather conditions.</p> <p>Flat sections of roof are often overlaid with materials that have a limited life expectancy and can fail without warning. Water ponding and weathered roofing material indicates that repair/replacement may be required. Inspection at close quarters may reveal further deterioration/damage to roofing materials, especially where these are original. A reputable roofing contractor can provide further advice.</p> <p>There is evidence of a wood boring insect infestation. Please see comments under Dampness, Rot &amp; Infestation.</p>

Rainwater Fittings	
Repair Category	2
Notes	Corrosion was noted to cast iron sections and leakage was noted from the system.

# Single Survey

Category 3	Category 2	Category 1
<b>Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.</b>	<b>Repairs or replacement requiring future attention, but estimates are still advised.</b>	<b>No immediate action or repair is needed.</b>

Main Walls	
Repair Category	2
Notes	<p>General weathering, staining and cracking was noted.</p> <p>External ground levels are high in areas and this can contribute to timber/damp defects. Ground levels should be lowered, where possible, to a suitable level beneath internal floor levels.</p> <p>The outer walls of the rear projection appear to be of lightweight timber construction. Regular maintenance should be anticipated.</p>

Windows, External Doors and Joinery	
Repair Category	2
Notes	<p>Doors and random windows are opened but not all and inspections can be restricted by window blinds, curtains, ornaments etc. Handles, locks and opening mechanisms can deteriorate through usage and repair or replacement can be anticipated on an ad hoc basis. No assurances can be provided that all window fittings are functional.</p> <p>The seals to double-glazed units can often fail resulting in condensation between the panes of glass. Failed sealed units can go undetected in certain weather/daylighting conditions, although such failings are not considered to be significant because the window/door remains functional albeit not as double glazing. This can occur without warning and may only be seen in certain weather conditions.</p> <p>Units appear of mixed ages and styles and all appear to be in excess of 20 years old. A degree of wear and tear and loose handles were noted. Some units may be reaching the end of their natural lifespan and replacement in the short to medium term should be considered.</p>

# Single Survey

Category 3	Category 2	Category 1
<b>Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.</b>	<b>Repairs or replacement requiring future attention, but estimates are still advised.</b>	<b>No immediate action or repair is needed.</b>

## External Decorations

Repair Category	N/A
Notes	Not applicable.

## Conservatories and Porches

Repair Category	2
Notes	<p>Flat sections of roof are often overlaid with materials that have a limited life expectancy and can fail without warning. Water ponding and weathered roofing material indicates that repair/replacement may be required. Inspection at close quarters may reveal further deterioration/damage to roofing materials, especially where these are original. A reputable roofing contractor can provide further advice.</p> <p>Units are of an older type and there are failed seals. There is a cracked window pane. The seals to double-glazed units can often fail resulting in condensation between the panes of glass. Failed sealed units can go undetected in certain weather/daylighting conditions, although such failings are not considered to be significant because the window/door remains functional albeit not as double glazing. This can occur without warning and may only be seen in certain weather conditions.</p> <p>Dampness/high moisture readings, deterioration and decay was noted to the timber panelling.</p> <p>Cracking was noted to external brickwork.</p>

## Communal Areas

Repair Category	N/A
Notes	Not applicable.

# Single Survey

Category 3	Category 2	Category 1
<b>Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.</b>	<b>Repairs or replacement requiring future attention, but estimates are still advised.</b>	<b>No immediate action or repair is needed.</b>

## Garages and Permanent Outbuildings

Repair Category	2
Notes	<p>The garage may contain asbestos based materials. See information on Asbestos in the Limitations of Inspection section above.</p> <p>Some repair and maintenance work is required to the various outhouse, stables/stores and garage. Given the age and construction, on going maintenance/repair work should be anticipated.</p> <p>There is a wall within the attached outhouse being help up by three timber restraints. The seller has advised that they have been there for over 20 years. Further advice can be sought from a suitably qualified contractor.</p>

## Outside Areas and Boundaries

Repair Category	1
Notes	Given the overall size of the grounds, ongoing tending, repair and maintenance work should be anticipated.

## Ceilings

Repair Category	1
Notes	Water staining was noted however, the seller has advised this was caused by a leak which has been repaired. This should be confirmed and monitored.

# Single Survey

Category 3	Category 2	Category 1
<b>Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.</b>	<b>Repairs or replacement requiring future attention, but estimates are still advised.</b>	<b>No immediate action or repair is needed.</b>

Internal Walls	
Repair Category	2
Notes	Damp staining and high moisture readings were noted (see section dampness, rot and infestation).

Floors including Sub-floors	
Repair Category	1
Notes	It is not unusual to discover areas of past water spillage when floor coverings are removed in kitchen and bathroom compartments, revealing the need for further repair and maintenance work.  Loose and creaking flooring was noted.

Internal Joinery and Kitchen Fittings	
Repair Category	2
Notes	A degree of wear and was noted overall.  There are loose/damaged hinges on some kitchen units.

Chimney Breasts and Fireplaces	
Repair Category	2
Notes	Flues should ideally be swept and tested on an annual basis.  All gas fires should be tested for safety prior to use by a Gas Safe registered contractor.  Damp staining and high moisture readings were noted (see section dampness, rot and infestation).

# Single Survey

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Internal Decorations	
Repair Category	1
Notes	A degree of wear and tear was noted.

Cellars	
Repair Category	N/A
Notes	Not applicable.

Electricity	
Repair Category	2
Notes	<p>It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC/ SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IET regulations.</p> <p>The consumer unit is formed in PVC materials which may no longer comply with current day regulations.</p> <p>There are aspects of the electrical installation which may not satisfy current day needs as there are a lack of sockets within some apartments.</p>

# Single Survey

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Gas	
Repair Category	1
Notes	Trade bodies governing gas installations currently advise that gas appliances should be tested prior to change in occupancy and thereafter at least once a year by a Gas Safe registered contractor. It is assumed that gas appliances comply with relevant regulations.

Water, Plumbing and Bathroom Fittings	
Repair Category	1
Notes	<p>Seals around bath/shower areas and sanitary fittings can be troublesome and do require regular maintenance. Failure to seals can result in dampness/decay within hidden areas of the property.</p> <p>Discolouration and mould was noted to seals and grouting.</p>

# Single Survey

Category 3	Category 2	Category 1
<b>Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.</b>	<b>Repairs or replacement requiring future attention, but estimates are still advised.</b>	<b>No immediate action or repair is needed.</b>

## Heating and Hot Water

Repair Category	1
Notes	<p>It is assumed that the heating and hot water systems have been installed in accordance with all relevant regulations and thereafter maintained on a regular basis.</p> <p>It is common practice for purchasers to have systems checked by an engineer immediately upon taking ownership, as stated in most offers to purchase used by conveyancers.</p> <p>Boilers and central heating systems should be tested and serviced by a Gas Safe registered engineer on an annual basis to ensure their safe and efficient operation.</p> <p>The exact date of installation is not known. Informed opinion suggests that many boilers have a life expectancy of between 10 and 20 years. A suitably qualified heating engineer will be able to advise further on repairing requirements or whether replacement is likely to be a more viable solution.</p>

## Drainage

Repair Category	1
Notes	No significant defects evident.

## Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

## Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

## Category 1

No immediate action or repair is needed.

### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

## 3. ACCESSIBILITY INFORMATION

### Guidance Notes on Accessibility Information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair.

The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres: For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin operated machines.

1. Which floor(s) is the living accommodation on?	Ground and first.
2. Are there three steps or fewer to a main entrance door of the property?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
3. Is there a lift to the main entrance door of the property?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
4. Are all door openings greater than 750mm?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
5. Is there a toilet on the same level as the living room and kitchen?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
6. Is there a toilet on the same level as a bedroom?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
7. Are all rooms on the same level with no internal steps or stairs?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>

## 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

### Matters for a Solicitor or Licensed Conveyancer

We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate.

Absolute ownership assumed. We are unaware if any easement, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the title deeds.

It is recommended that where repairs, defects and/or maintenance items have been identified, interested parties should make the appropriate enquiries in order to satisfy themselves of potential costs and the extent of works required prior to submitting a legal offer to purchase.

We have been advised that the grounds amount to approximately 10 acres. This should be legally confirmed.

The subjects have been altered at points in the past with the addition of a small porch, rear projection and attic accommodation. It is understood these were carried out in excess of 30 years ago and can be treated as historic. This should be confirmed.

The seller has advised that part of the cessnock water is owned by the subject property (the section that runs between two bridges located within the property grounds). This should be legally confirmed.

We are not aware of any history of flooding or related issues but the location of the part of cessnock water that runs within the property boundary may require to be brought to the attention of insurers. It is assumed that insurance will be available on normal terms.

There is a telegraph pole on the grounds. Any rights of access should be confirmed.

### Estimated Reinstatement Cost (£) for Insurance Purposes

Eight Hundred and Seventy Thousand Pounds:  
£870,000

It should be noted this sum is an estimate calculated by using a rate per square metre based on information provided by Building Cost Information Service (BCIS).

### Valuation (£) and Market Comments

Three Hundred and Seventy Thousand Pounds:  
£370,000

Our valuation reflects current market conditions relating to this area. We would assume that current market trends will prevail at the ultimate date of disposal with no adverse or onerous matters being introduced into the market during the intervening period which would have a detrimental effect on price.

# Mortgage Valuation Report

Property Address: Little Bargour, Mauchline Road, , Hurlford, KA1 5JX

Date of Inspection: 27th January 2026

Reference: 1396858

## Location & Description

### 1. Location:

The subjects are located rurally between the towns of Kilmarnock and Mauchline, just off of the A76. Local amenities can be found within a reasonable commute.

It should be appreciated that the A76 and a railway line run close to the subjects.

The cessnock water runs within the property boundary.

### 2. Description:

The subjects comprise of a detached single storey and attic chalet style cottage.

### 3. Age:

Built circa 1800 (226 years old)

### 4. Main Construction:

Walls: Solid stone.

Roof: Pitched and slated.

### 5. Accommodation:

Ground Floor: porch, hall, kitchen, inner hall, two bedrooms, bathroom, lounge, dining room and sitting room.

First Floor: landing and two bedrooms.

### 6. Floor Area - excluding garages and outbuildings:

Gross internal floor area: 157

Gross external floor area: 205

### 7. Garage and Outbuildings:

Single garage, attached outhouse, stables, hay shed and other timber sheds/stores.

## Services / Roads

### 8 Main Service:

Water:	Yes:	✓	No:
Electricity:	Yes:	✓	No:
Gas:	Yes:	✓	No:
Drainage:	Yes:	✓	No:

For comments on non-mains services, see section 15.

### 8a. Heating:

Gas fired boiler.

### 9. Roads - assumed adopted (If no see section 15. General Remarks)

Yes: ✓ No:

## General Condition

### 10. Essential Repairs - comments confined to defects which would materially affect the property and/or value/suitably for mortgage purposes.

None apparent.

Retention: Yes: No: ✓

Retention amount:

### 11. Subsidence, Settlement and Landslip:

The property has been affected by previous movement but within the limitations of the inspection there was no evidence to suggest that this is ongoing.

### 12. General Condition:

The property appeared to be in a condition generally consistent with its age and type. Some areas of upgrading/modernisation and repair/ maintenance work are required.

## Legal & Other Matters

### 13. Alterations: Has the property been extended/converted/altered? (If yes, see section 15)

Yes: ✓ No:

# Mortgage Valuation Report

## 14. Tenure - assumed ownership with marketable title (If no, see section 15)

Yes: ✓

No:

## 15. General Remarks:

We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate.

Absolute ownership assumed. We are unaware if any easement, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the title deeds.

It is recommended that where repairs, defects and/or maintenance items have been identified, interested parties should make the appropriate enquiries in order to satisfy themselves of potential costs and the extent of works required prior to submitting a legal offer to purchase.

We have been advised that the grounds amount to approximately 10 acres. This should be legally confirmed.

The subjects have been altered at points in the past with the addition of a small porch, rear projection and attic accommodation. It is understood these were carried out in excess of 30 years ago and can be treated as historic. This should be confirmed.

The seller has advised that part of the cessnock water is owned by the subject property (the section that runs between two bridges located within the property grounds). This should be legally confirmed.

We are not aware of any history of flooding or related issues but the location of the part of cessnock water that runs within the property boundary may require to be brought to the attention of insurers. It is assumed that insurance will be available on normal terms.

There is a telegraph pole on the grounds. Any rights of access should be confirmed.

## 16. Comments on Mortgageability:

The property is considered suitable for mortgage purposes subject, as always, to the policy of the individual lender. In particular those relating to properties with over 1 acre of land.

## Valuation & Insurance

### 17.1 Valuation in present condition (words and figures):

Three Hundred and Seventy Thousand Pounds: £370,000

### 17.2 Valuation upon completion of any works required under section 9 (words and figures):

### 17.3 Insurance reinstatement: Approximate current reinstatement cost including site

# Property Questionnaire

# Property Questionnaire

**Property Address:**

Little Bargour, Mauchline Road,, Hurlford, KA1 5JX

**Seller(s):**

This is a rural property with land and outbuildings

**Completion Date of Property Questionnaire:** 23/01/2026

**Note for sellers.**

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the Date of Entry for the sale of your house, tell your solicitor or estate agent immediately.

# Property Questionnaire

## 1. Length of ownership

How long have you owned the property? 31 years

## 2. Council Tax

Which Council Tax band is your property in? E

## 3. Parking

What are the arrangements for parking at your property? (Please indicate all that apply)

Garage	Yes	Allocated parking space	Yes	Driveway	Yes
Shared parking	No	On street	No	Resident permit	No
Metered parking	No	Other:			

## 4. Conservation Area

Is your property in a designated Conservation Area (i.e. an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance)? No

## 5. Listed Building

Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)? No

# Property Questionnaire

## 6. Alterations/additions/extensions

**A. (i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet or bedroom)?** No

If you have answered yes, please describe the changes which you have made:

**(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?**

If you have answered yes, the relevant documents will be needed by the purchaser, and you should give them to your solicitor as soon as possible for checking.

If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent can arrange to obtain them.

**B. Have you had replacement windows, doors, patio doors or double glazing installed in your property?** Yes

If you have answered yes, please answer the three questions below:

(i) Were the replacements the same shape and type as the ones you replaced? Yes

(ii) Did this work involve any changes to the window or door openings? No

(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed): some windows replaced 19 years ago

**Please give any guarantees which you received for this work to your solicitor or estate agent.**

# Property Questionnaire

## 7. Central Heating

**A. Is there a central heating system in your property?**

Yes

(Note: a partial central heating system is one which does not heat all the main rooms of the property – the main living room, the bedroom(s), the hall and the bathroom).

**If you, have answered yes/partial – what kind of central heating is there?** (Examples: gas-fired, solid fuel, electric storage heating, gas warm air)

gas mains

**If you have answered yes, please answer the 3 questions below:**

**B. When was your central heating system or partial central heating system installed?**

new boiler and some radiators replaced

**C. Do you have a maintenance contract for the central heating system?**

No

If you have answered yes, please give details of the company with which you have a maintenance agreement:

**D. When was your maintenance agreement last renewed?** (Please provide the month and year).

# Property Questionnaire

## 8. Energy Performance Certificate

Does your property have an Energy Performance Certificate which is less than 10 years old?

No

## 9. Issues that may have affected your property

- a. Has there been any storm, flood, fire or other structural damage to your property while you have owned it?

Yes

If you have answered yes, is the damage the subject of any outstanding insurance claim?

none

- b. Are you aware of the existence of asbestos in your property?

Don't know

If you have answered yes, please give details:

## 10. Services

- a. Please tick which services are connected to your property and give details of the supplier:

Services	Connected	Supplier
Gas/liquid petroleum gas	Don't know	
Water mains/private water supply	Yes	Scottish Water
Electricity	Yes	Scottish Power
Mains Drainage	Yes	?
Telephone	Yes	BT
Cable TV/Satellite	Yes	Sky
Broadband	Yes	BT

# Property Questionnaire

- b. **Is there a septic tank system at your property?**

Yes

If you have answered yes, please answer the two questions below:

- c. **Do you have appropriate consents for the discharge from your septic tank?**

Don't know

- d. **Do you have a maintenance contract for your septic tank?**

No

If you have answered yes, please give details of the company with which you have a maintenance contract:

none

## 11. Responsibilities for a Shared or Common Areas

- a. **Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?**

No

If you have answered yes, please give details:

- b. **Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?**

No

If you have answered yes, please give details:

- c. **Has there been any major repair or replacement of any part of the roof during the time you have owned the property?**

Yes

- d. **Do you have the right to walk over any of your neighbours' property - for example to put out your rubbish bin or to maintain your boundaries?**

No

# Property Questionnaire

If you have answered yes, please give details:

- e. **As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?** No

If you have answered yes, please give details:

- f. **As far as you are aware, is there a Public Right of Way across any part of your property? (A Public Right of Way is a way over which the public has a right to pass, whether or not the land is privately-owned.)** No

If you have answered yes, please give details:

## 12. Charges associated with your property

- a. **Is there a factor or property manager for your property?** No

If you have answered yes, please provide the name and address and give details of any deposit held and approximate charges:

- b. **Is there a common buildings insurance policy?** No

If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?

- c. **Please give details of any other charges you must pay on a regular basis for the upkeep of common areas or repair works, e.g. to a Residents' Association, or maintenance or stair fund.**

# Property Questionnaire

## 13. Specialist Works

- a. As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?

No

If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.

- b. As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?

Don't know

If you have answered yes, please give details.

- c. If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work?

If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself, please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate.

**Guarantees are held by:**

## 14. Guarantees

A.	Are there any guarantees or warranties for any of the following:	
(i)	Electrical work	No
(ii)	Roofing	No
(iii)	Central heating	No
(iv)	NHBC	No
(v)	Damp course	No

# Property Questionnaire

(vi)	<b>Any other work or installations?</b> (for example, cavity wall insulation, underpinning, indemnity policy)	No
------	--	----

If you have answered 'yes' or 'with title deeds', please give details of the work or installations to which the guarantee(s) relate(s):

- B. Are there any outstanding claims under any of the guarantees listed above?** No

If you have answered yes, please give details:

## 15. Boundaries

- So far as you are aware, has any boundary of your property been moved in the last 10 years?** No

If you have answered yes, please give details:

## 16. Notices that affect your property

**In the past 3 years have you ever received a notice:**

- a. **Advising that the owner of a neighbouring property has made a planning application?** No
- b. **That affects your property in some other way.** No
- c. **That requires you to do any maintenance, repairs, or improvements to your property.** No

If you have answered yes to any of a-c above, please give the notices to your solicitor or estate agent, including any notices which arrive at any time before the date of entry of the purchase of your property.

## You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£6,777	See your recommendations report for more information
Over 3 years you could save*	£1,446	

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

Very energy efficient - lower running costs

Not energy efficient - higher running costs

Current	Potential
63	83

## Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (63)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Very environmentally friendly - lower CO<sub>2</sub> emissions

Not environmentally friendly - higher CO<sub>2</sub> emissions

Current	Potential
56	69

## Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (56)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Flat roof or sloping ceiling insulation	£900 - £1,200	£243.00
2 Internal wall insulation	£7,500 - £11,000	£837.00
3 Floor insulation (solid floor)	£5,000 - £10,000	£363.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit [greenerscotland.org](http://greenerscotland.org) or contact Home Energy Scotland on 0808 808 2282.

**THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE**

## Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction. See the addendum section on the last page of this report for further information relating to items in the table.

Element	Description	Energy Efficiency	Environmental
Walls	Granite or whin, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
	Timber frame, as built, partial insulation (assumed)	★★★★☆	★★★★☆
Roof	Pitched, 150 mm loft insulation	★★★★☆	★★★★☆
	Flat, limited insulation	★☆☆☆☆	★☆☆☆☆
	Roof room(s), no insulation (assumed)	★☆☆☆☆	★☆☆☆☆
Floor	Solid, no insulation (assumed)	—	—
Windows	Partial double glazing	★☆☆☆☆	★☆☆☆☆
Main heating	Boiler and radiators, mains gas	★★★★☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	None	—	—
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Good lighting efficiency	★★★★☆	★★★★☆

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 43 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 6.6 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.0 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

## Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£5,925 over 3 years	£4,479 over 3 years	
Hot water	£597 over 3 years	£597 over 3 years	
Lighting	£255 over 3 years	£255 over 3 years	
<b>Totals</b>	<b>£6,777</b>	<b>£5,331</b>	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

## Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures	Indicative cost	Typical saving per year	Rating after improvement	
			Energy	Environment
1 Flat roof or sloping ceiling insulation	£900 - £1,200	£81		
2 Internal wall insulation	£7,500 - £11,000	£279		
3 Floor insulation (solid floor)	£5,000 - £10,000	£121		
4 Solar photovoltaic panels, 2.5 kWp	£8,000 - £10,000	£236		
5 Wind turbine	£5,000 - £20,000	£712		

## Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to [www.greenerscotland.org](http://www.greenerscotland.org).

## About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Flat roof or sloping ceiling insulation

Insulating a flat roof or sloping ceiling will significantly reduce heat loss through the roof; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulation can be placed on top of the roof under the waterproof membrane and should particularly be considered when the waterproofing needs to be replaced. Further information about roof insulation and details of local contractors can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)). Building regulations generally apply to this work so it is best to check with your local authority building standards department.

### 2 Internal wall insulation

Internal wall insulation involves adding a layer of insulation to the inside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. Further information can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)).

### 3 Floor insulation (solid floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulating solid floors can present challenges; insulation laid on top of existing solid floors may impact on existing doors and finishes whilst lifting of a solid floor to insert insulation below will require consideration of the potential effect on both structural stability and damp proofing. It is advised to seek advice from a Chartered Structural Engineer or a registered Architect about this if unsure. Further information about floor insulation is available from many sources including [www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation](http://www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation). Building regulations generally apply to this work and may also require a building warrant so it is best to check with your local authority building standards department.

### 4 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

### 5 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

## Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

## Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit <https://energysavingtrust.org.uk/energy-at-home> for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	24,660.03	N/A	N/A	N/A
Water heating (kWh per year)	2,680.71			

## Addendum

When considering the PV installation consider installing PV battery and a PV diverter for water heating

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

## About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst ([www.elmhurstenergy.co.uk](http://www.elmhurstenergy.co.uk)), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk) and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:	Mr. Kevin Masson
Assessor membership number:	EES/020018
Company name/trading name:	D M Hall Chartered Surveyors LLP
Address:	15 Miller Road Ayr KA7 2AX
Phone number:	01292 286974
Email address:	<a href="mailto:kevin.masson@dmhall.co.uk">kevin.masson@dmhall.co.uk</a>
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

## Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk), with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at [www.gov.scot/epc](http://www.gov.scot/epc).

## Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit [greener-scotland.org](https://www.greener-scotland.org) or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.
